Turnkey system construction – IDIOM designed, developed, and delivered

- Funds management applications
- Tourism services, internet 'direct to consumer' applications
- Local government building consent management
- Rail costing systems

Differentiators

- Author and exclusive owner of the Idiom products: **IDIOM** Decision Manager, **IDIOM** Forms, **IDIOM** IQ Workbench, **IDIOM** Database Mapper
- The first (2001) to differentiate '**decision**' as a distinct class within the universe of business rules, and to develop new analysis and development approaches based on this
- **IDIOM** has harvested the benefits of dozens of early adopter customer projects to develop, test, and refine decision centric development across many domains
- A global leader in development of the decisioning concept, with articles published in the *Business Rules Journal* (2007), *The Data Administration Newsletter* (2009), and *Modern Analyst* (2010), plus a strong global following of our Twitter identity, '*Intelligent Form*'
- Pioneered the fusion of decision centric development with agile methodologies to derive outstanding business agility with even lower cost, risk, and time to develop
